

# BOOTS, KNEE PADS & HOOD

## RONSTAN 4MM RACE BOOTS

These boots have hard-wearing molded soles and extra heel and toe texturing to provide firm foot support and reliable grip. Their padded neoprene upper is reinforced for hiking comfort. The Race Boots are lightweight and comfortable, with Mauser tape binding for durability. A side zipper makes for easy

fitting and a hook and loop fastener tab secures the zipper.

## GUL TI-2 4MM SIDE-ZIP SAILING BOOTS

Medium thick soles make these boots suitable for cat and dinghy sailing or kayaking. Upper boot is warm and easy entry side zip has a special gusset to prevent water and sand from entering the boot. Boot toes, tops and heels are reinforced to prevent wear from sitting, crawling and use with hiking straps. Velcro® adjustable ankle strap is optional or removable. Men's sizing runs a half size large. Women should order 2 sizes smaller than normal shoe size.

## GUL TI-2 5MM STEAMER BOOTS

Purpose designed for windsurfing and kiteboarding. Thinner soles allow feel required for board sports, but they are still good for all-around use. Round toes and poly-twill foot tops are designed for use with footstraps. Neoprene uppers are reinforced at heels and toes. Arch straps prevent ballooning and foot roll issues. Men's sizing runs large. Women should order 2 sizes smaller than normal shoe size.

## C-SKIN TI-2 5MM SPLIT TOE BOOTS

Purpose designed for surfing, but extra warmth and special design features are appreciated by many kite boarders and wind surfers. Split toe boot design, plus a unique "bio-tech" layered panel system combine to provide unequalled support and virtually no "foot roll." Raw cut upper edges facilitate easy entry and exit. Men's sizes run large. Women should order 2 sizes smaller than normal shoe size.

## GUL TI-2 3MM PEAKED CAP

Gul's titanium-lined neoprene hood features a double-lined center panel. The small visor deflects water from the face and provides shade.

## CHOOSING THE RIGHT BOOTS

### First, it's all about "sole":

- Cat Sailors: Thicker and stiffer soles provide needed support.
- Paddlers: Thicker and stiffer are best for walking on rocks.
- Windsurf and Kite: Thinner is better for feel; round toes are less likely to catch on footstrap.
- Surf: Thinner sole with split toe permits most natural feel and balance.

### Boot "uppers" are important, too:

- Cat: Reinforced toes for crawling, side zips for easy entry and exit.
- Paddle: Same as cat, but less critical.
- Windsurf and Kite: Tops should be suitable for footstraps, plus arch strap to prevent boots from ballooning with water.
- Surf: Issues are warmth, "ballooning" and toe (end/top) wear.

## GUL TI-2 3MM STRAPPED SLIPPERS

Purpose designed for windsurfing and kiteboarding. Thinner soles allow for board sports, but they are still good for all around use. Round toes and poly-twill foot tops are designed for use with footstraps. Neoprene uppers are reinforced at heels and toes and are ideal for crawling on catamaran tramps. Arch straps help hold slippers in place. Men's sizing runs a half size large. Women should order 2 sizes smaller than normal shoe size.

\$44.95

38-5130-8	Size 8-9	38-5130-12	Size 12-13

## GUL 3MM POWER SLIPPERS

Gul's Power Slippers provide economical foot protection at an affordable price. They have thin soles, round toes, and neoprene uppers that are reinforced at heels and toes. An adjustable cord at the foot top aids in keeping the slippers in place. Men's sizing runs a half size large. Women should order 2 sizes smaller than normal shoe size.
